SOLUTIONS IN WOOD

FIN*floor*

LAMINATE FLOORING

CREATING YOUR SPACE

Creating your space:

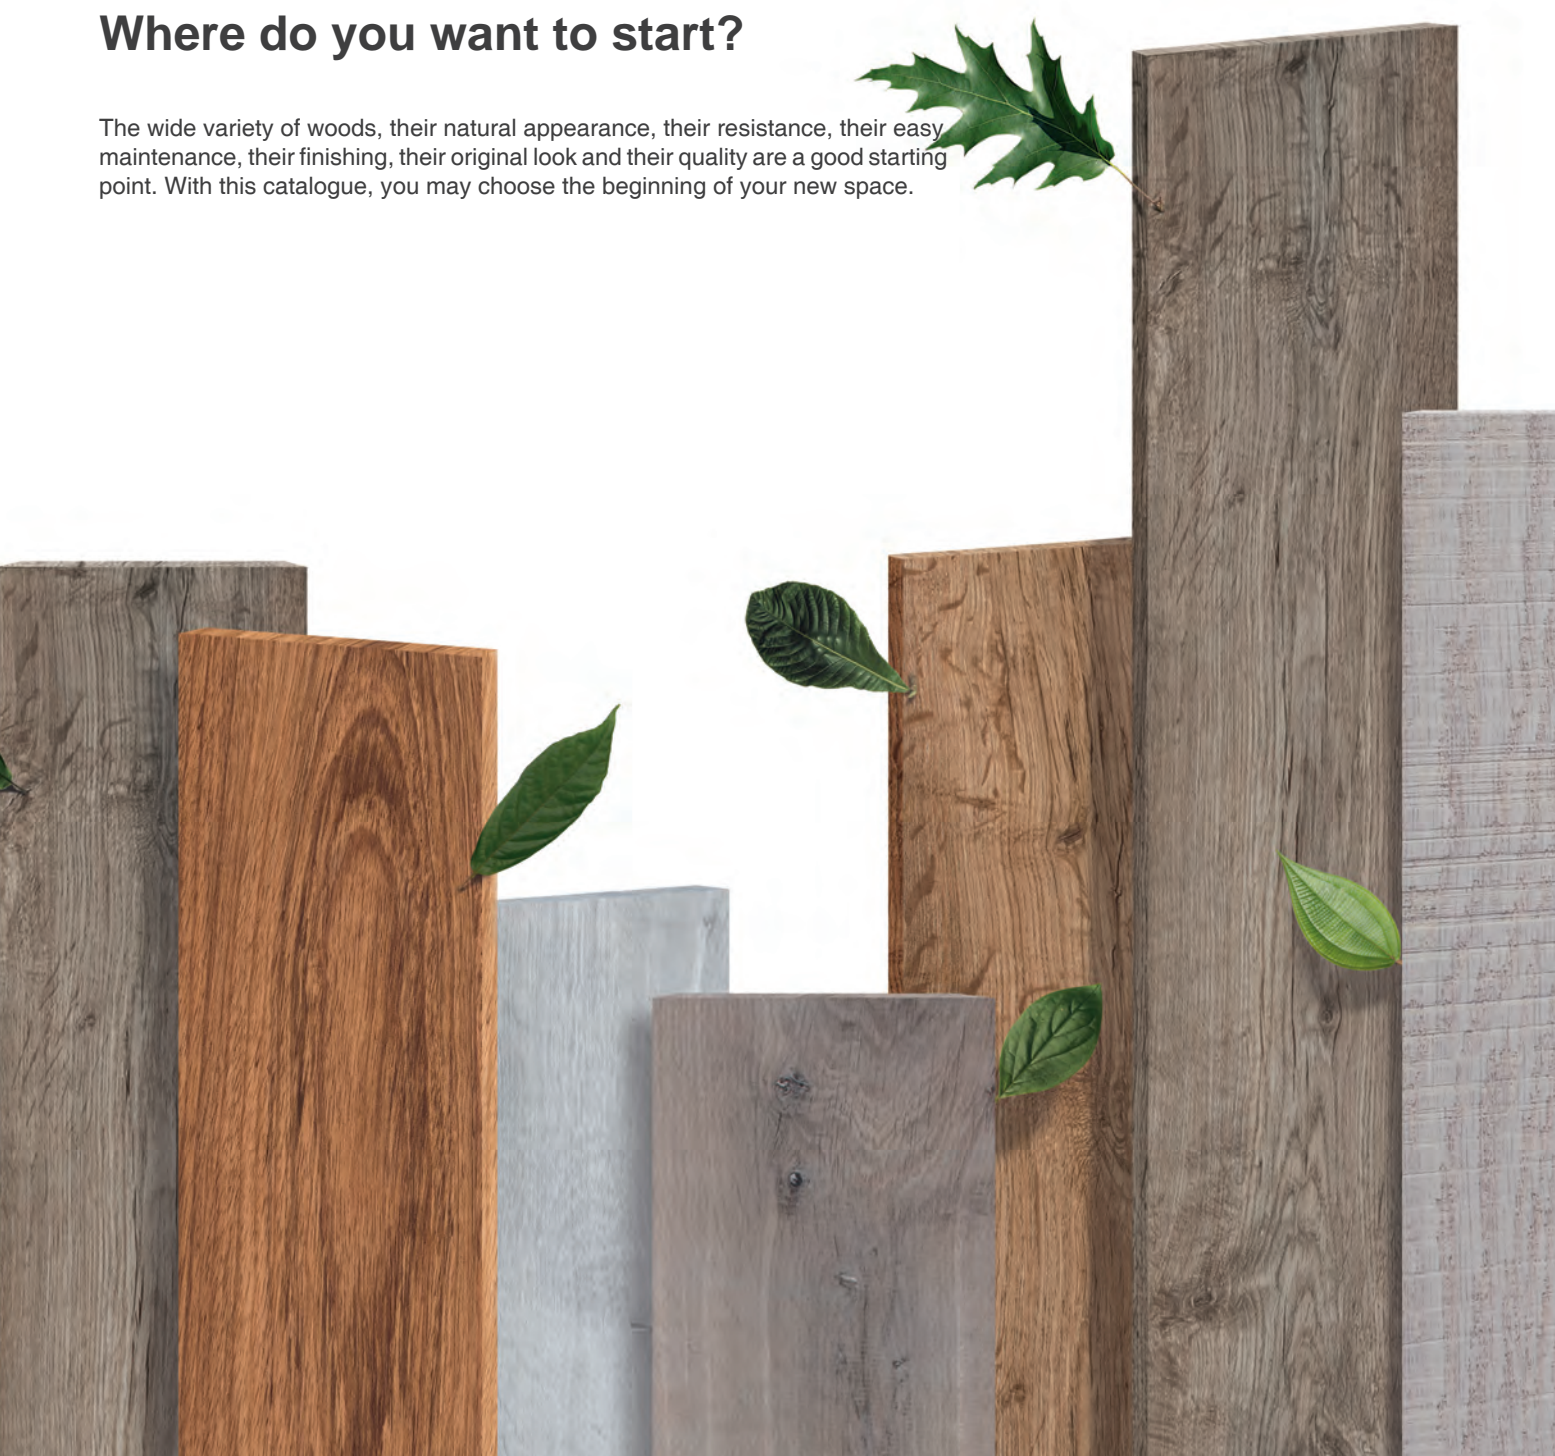

Environments vary according to individual tastes and needs; thus, Finfloor offers a wide variety of options so that you may create a new space altogether or just transform it.

Get into renewing the image conveyed by the decoration of your home. The very beginning of your space - the floor - can turn any rooms into rooms that are luminous, rustic, classical, contemporary, ...

Thanks to its click system, its installation is quick and easy. You just have to think about selecting the type of design that best suits your needs.

Where do you want to start?

The wide variety of woods, their natural appearance, their resistance, their easy maintenance, their finishing, their original look and their quality are a good starting point. With this catalogue, you may choose the beginning of your new space.

Finishes

The variety of Finfloor finishes ranges offer you the beauty and visual richness of the nature for your enjoyment at home.

These finishes are applied according to the type of wood that is reproduced in the blade, thereby enhancing the latter and the even closer to reality. With the wide range of finishing it will be very easy to create comfortable spaces for everyday life. This is “the beginning of their space.”

60

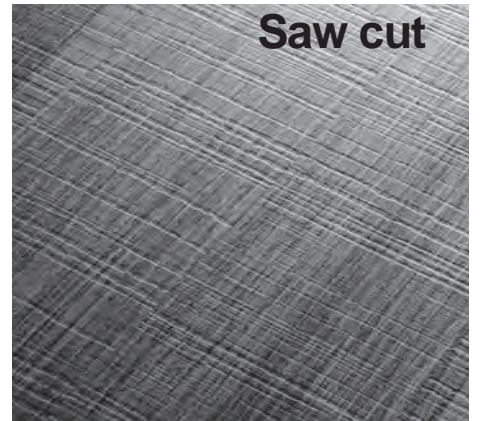

¡NEWS!

Dry-touch

This matt finish provides a real texture thanks to its raw wood look.

Saw cut

Two balanced combination of brightness levels that reproduce the classic grooves of the lumber, while getting an ultra-realistic effect.

Wood impression

Faithful reproduction of original materials as the texture of the wood matches perfectly with the design.

Sovereign Oak: There are a wide range of shades.

Luxury Walnut: With a high realism matt finish.

Nature

Fine and elegant pore finish which along with a medium-high brightness level, can reproduce the effect of a newly varnished wood giving a light texture and soft touch.

Wood-touch

This rugged touch finish gives a strong character to the design and at the same time offers a medium-high brightness level.

Handscraped

A finish which reproduces the effect of a traditional hand-made wood. Perfect finish for rustic and noble woods.

Matt-oil

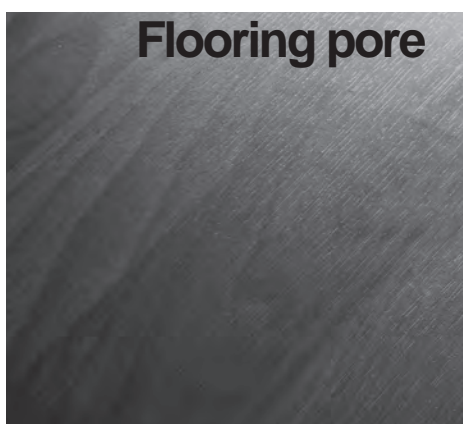

Closed pore finish which reproduces the effect of oil varnishes getting the most matt appearance of the Finfloor range.

Rustic pore

Wood pore structure that reproduces the discontinuous irregular grain, highlighting the colors of the wood.

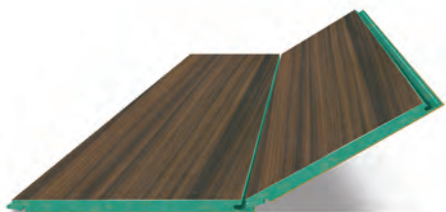

Flooring pore

Finished with a satin classical linear pore thanks to its smooth structure.

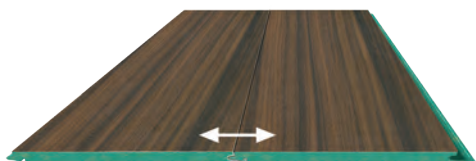

the easiest and most resistant installation system

EASY AND RESISTANT

Easy to install and with a long service life

FINfloor incorporates the most modern and prestigious installation system available in the market, without the need for adhesives or glue. Simply line one section up with another and thanks to its 'click' system, this flooring is extremely easy to install. The time needed to install this flooring has been drastically reduced thanks to this 'click' system, manufactured in accordance with patents EP 0843763 and US 6006486.

Resistance

FINfloor's CLIC anchoring system and the high-precision machine work make sure that planks do not separate from each other thanks to their high tensile strength.

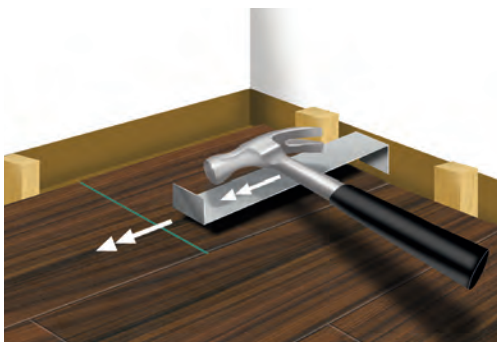

Sealed joints

Protection

The paraffin covering the entire profile protects your floor against humidity. Moreover, this **edge sealing** also serves to reduce the unpleasant noise produced by friction. The use of a moisture-resistant support provides greater dimensional stability to the entire set.

HORIZONTAL INSTALLATION

Horizontal installation

FINfloor allows installation without need to lift the boards at an angle (angle-snap fitting), which makes the fitting of the final boards of an installation much easier.

Easy installation
Manufactured using technology
protected by
EP 0 843 763 y US 6 006 486

Does not lose its colour with light

High resistance to wear and tear

Non-allergenic

features

HYDRO PROTECT

FINfloor has a high resistance through its moisture¹ technology HYDRO PROTECT:

- High density wood fiber support, made with special resins that provide improved dimensional stability.
- Sealing of edges. The perimeter of each plank has been coated with paraffin to protect the penetration of moisture.
- High precision and resistance glueless click system, preventing from leakings.

¹ FINfloor is not suitable for outdoor installation, or any other environment with a high level of humidity such as kitchens, bathrooms or laundries.

FIRE RESISTANCE

Certified by accredited independent organisations as Euroclass Bfl_{s1} (in accordance with EN13501-1). Developed specifically for high risk spaces, in accordance with the requirements of European's Technical Buildings Code.

¹ Except CLASSICS range, which is classified as Cfl

ANTISTATIC

A special treatment is used to reduce the build-up of static electricity and therefore the occurrence of electric shocks.

Particularly suitable for commercial properties and offices. This innovative technology significantly improves one of the major drawbacks of many types of flooring.

Anti-static classification <2kv in accordance with EN1815.

CLASS OF USE AND RESISTANCE TO ABRASION

FINfloor is recommended for heavy domestic use and/or general commercial use.

We have also improved surface resistance to abrasion and wear, reaching the level AC5¹.

These two features make FINfloor a laminate flooring you can install with all the guarantees in both home and commercial.

¹ Except CLASSICS range, which is classified as AC4

Resistant to cigarette burns

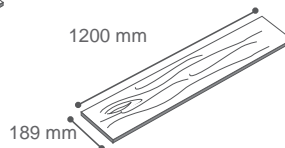

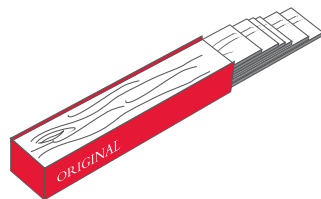

Easy to clean

FINfloor

ORIGINAL

The ORIGINAL FINfloor range of 19cm width, has over 50 designs available: single board, 2 or 3 planks format, rustic, modern or classic designs... **Choose your style!**

WOOD

ENGINEERED
WOOD

If what you want is real wood, try our **FINfloor Wood** range.

FINfloor Wood is the ideal solution for anyone wishing to create the natural look of real wood with the comfort and ease of clic system laminate flooring (glueless).

With a 3 mm layer of solid wood, phenolic faced plywood and BONA varnishes, you can have authentic traditional wooden flooring such as Beech and Oak or even more exotic woods such as Jatoba or Wenge.

1080 mm*

Multiple-strip 188 mm
Single-strip 140 mm

14
mm

* (jatoba and Oak 3 strips also available in 2200 mm)

3mm SOLID LAYER

7 COATS OF VARNISH

The last layer of finish contains a product specially developed by BONA, a leading manufacturer of varnish, which improves surface resistance in comparison to traditional varnishes.

2mm COUNTER FACE

PHENOLIC FACED PLYWOOD

GREATER DIMENSIONAL STABILITY
Thanks to the phenolic resins used on the plywood core, our flooring offers greater stability against moisture, greater overall solidity and precise joints between sections.

SEALED EDGES

The paraffin applied to the underside of joints reduces the noise caused by friction.

EASY INSTALLATION

Glueless easy installation with a CLICK system on all four sides.

Accessories

For a complete installation, we also offer our full range of original skirting boards and profiles whose tones perfectly match each floor design. Manufactured with a **water-resistant** support for greater resistance against humidity.

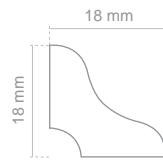

The profiles for horizontal application are subjected to greater wear and tear due to friction and stepping. Thus, they are manufactured with laminate, for high **resistance to wear and tear**.

SKIRTING BOARDS

SCOTIA

Low skirting for applications in which the height of standard 70 or 90 skirting is excessive. E. g. : Meeting points with cupboard sliding doors, galleries, doors, window doors, with the skirt boards of certain pieces of furniture, etc...

Length: 2.4 m / Pieces per box: 20

FLAT SKIRTING

Modern lines skirting with a cables channel available in 9 cm.

Length: 2.4 m / Pieces per box: 5

FLAT SKIRTING

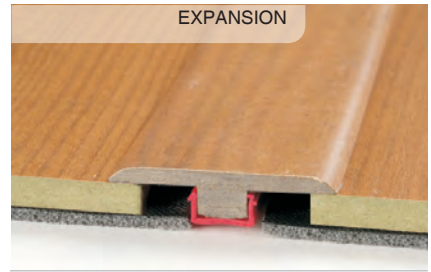

Modern lines skirting with a cables channel available in 7 cm.

Length: 2.4 m / Pieces per box: 5

PROFILE

EXPANSION

Profile for joining same-level flooring.

Length: 2.4 m / Pieces per box: 10

i Since laminate flooring is made of wood fibers, it needs expansion / contraction joints. The use of expansion profiles is vital in all doorways to enable the free movement of floating floors.

STAIRS

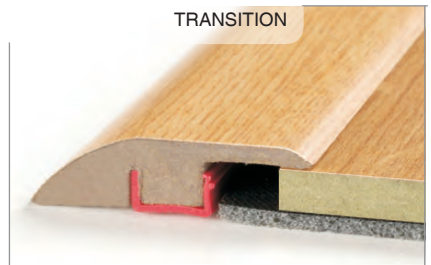

Profile for stair end.

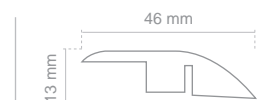

Length: 2.4 m / Pieces per box: 5

TRANSITION

Transition profile between floors with different levels (e.g. parquet, ceramics, carpets...)

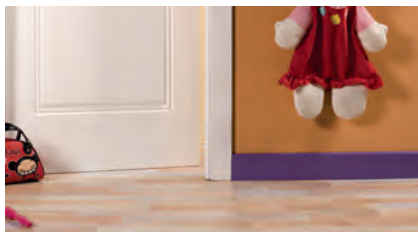

Length: 2.4 m / Pieces per box: 10

Matching

Each floor design, however exotic it may seem, has a matching complement. Please find in the attached table the COMPLEMENTS design code that matches your floor design.

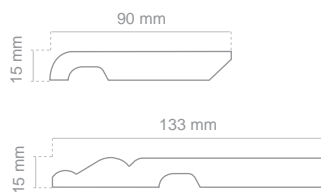

PREPAINTED SKIRTING

Personalize your own skirting

We offer the possibility of painting the skirting board in whatever colour you wish. We provide it half finished so that you can give free rein to your imagination.

Thus, you can match or contrast the tones of your floor, walls, doors, etc...

Length: 2.4 m / Pieces per box: 10

Accessories

Finfloor floating floors should be installed upon an underlay in order to compensate for minor irregularities of the base floor and that serve as a protection against humidity.

New building requirements have led us to develop high-performance products that provide a response to new concerns such as noise conveyed through the floor; reverberated sound or radiant heating.

UNDERLAYS

TWIN UNDERLAY

m² roll (lxw): 75 x 1

The new TWIN comes with a plastic film with flaps, which improve its capacity to create a steam barrier, just like with PE and SILENT.

2 mm

FINFLOOR PE

m² roll (lxw): 25 x 1

This polyethylene underlay comes with an insulating film to properly protect your Finfloor flooring against humidity. Additionally, it has excellent tensile strength and very good levelling power, as well as good sound insulation properties. As it is a product from the intermediate range, it guarantees excellent performance, well above the market average.

3 mm

OTHERS

UNDERLAY ADHESIVE TAPE

6 rolls 66 m x 50 mm

For joining different strips of underlay.

INSTALLATION KIT

Unit: 1 Kit

Comprising spacing wedges for facilitating the creation of expansion joints during assembly, plus a tapping block in order not to damage your Finfloor flooring in case of strokes and pull-bar for a easier installation in the last row.

The use of original accessories is very important for guaranteeing proper installation and the result of your Finfloor once it is mounted.

The underlay plays a vital role in protecting against humidity in the floor upon which it is mounted, while helping to compensate for any irregularities in the base floor up to 3 mm per m.l.

The guarantee offered by Finfloor is completely null and void once a different underlay from the recommended one is used.

RESISTANCE AGAINST WEAR AND TEAR OR RUPTURE. During installation, the underlay suffers the effects of traffic of people and materials. If it gets torn, it loses its functionality.

RESISTANCE TO COMPRESSION. The underlay's resistance to compression when weight is applied upon it (furniture, people,...) influences its levelling effect, its level of noise reduction and its resistance against floor joints.

RESISTANCE AGAINST PERFORATION. Level of resistance against perforation.

REVERBERATED NOISE. Perception of noise within the room which is produced by walking. The underlay designed to reduce this type of noise generates a greater feeling of comfort and of walking upon a solid base.

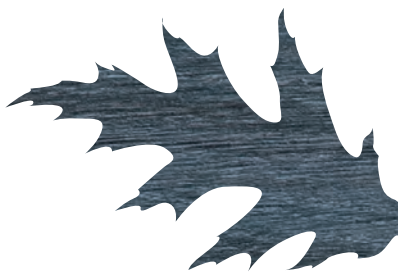

TRANSMITTED NOISE. Perception of noise within the room which is produced by walking. It is a property required by new construction regulations to improve habitability and to prevent noise from being transmitted from one residence to others.

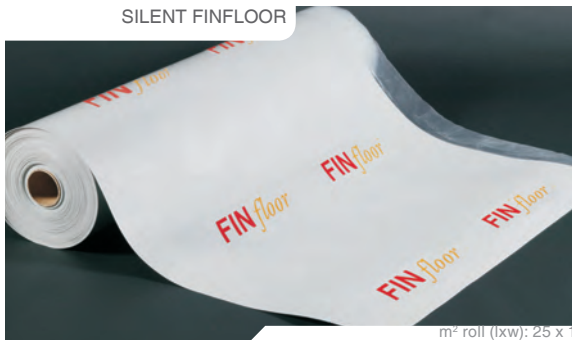

RADIANT HEATING. Radiant heating may damage laminated floors due to excess temperature or by drying up the environment. Always use the recommended underlay to optimize heat transfer (and the energy savings it entails) and to insulate against humidity.

Follow the recommendations in case of installations with radiant heating.

SILENT FINFLOOR

m² roll (lxw): 25 x 1

Specifically developed to improve the feeling of comfort when stepping on your Finfloor floor. Drastically lowers the level of noise generated in the house, besides complying with all requirements for noise transmission to the floor below.

Additionally, this underlay is specifically recommended for installations with radiant heating, due to its ability to transfer heat and as a barrier against humidity thanks to the insulating polyethylene film that comes with it.

These performances are further complemented by exceptional resistance against perforation and compression, which makes this underlay an ideal complement for your installation and to ensure the end result of your Finfloor.

2 mm

Cleaning instructions

✓ RECOMMENDED

Use a broom, a dust mop, a vacuum cleaner with a parquet brush, or a dry mop.

Use pH-neutral, non-abrasive detergents.

Use only recommended products.

Use a vacuum cleaner with a parquet brush to clean grooved products. If this is not enough, then use a slightly damp cloth.

If any water is spilled, dry it out immediately. Avoid any stagnation of liquids.

To remove any tough stains upon the surface (**NEVER** in joints or grooves), use slightly diluted acetone or alcohol for household use. Then, clean with water.

Special care must be taken in pets' sleeping areas. (Urine may damage the floor. Try to avoid it and clean it immediately).

✗ NOT RECOMMENDED

Never use abrasive accessories (steel wool, pan scrubs, etc.) or cleaning machines.

Wax and other wooden floor or furniture cleaning or shining products are not suitable for this product.

Never use or introduce any sharp objects, or any abrasive, cutting or humid products, etc. into the joints.
